

DRM – RECEIVER UPDATE

HFCC Conference B11, Dallas – 13 Sep 2011

Ludo Maes – TDP, Belgium

Portable DRM30 receivers available on the market

Himalaya DRM 2009

€ 199,00

Morphy Richards DRM 27024

€ 79,00
~~€ 99,00~~

Technisat MultyRadio

€ 149,00

Uniwave Di-Wave 100

€ 249,00

Car DRM30 receivers available on the market

StarWaves CarBox

€ 229,00

~~€ 249,00~~

Where to buy a DRM30 receiver ?

HI-1110, the new generation of DRM module

New DRM receivers from NewStar Electronics

NewStar DR111

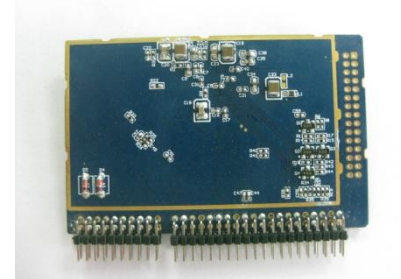

NewStar HG-101

NewStar car receiver

NewStar DRM module

New DRM receivers from MSway

MSway MDR-S100

MSway MDR-U100

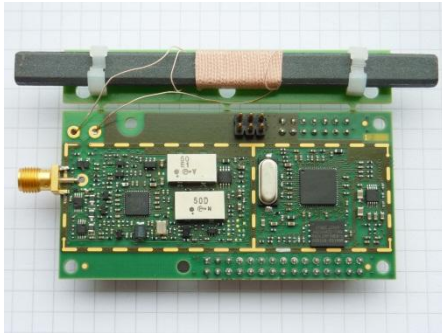

MSway MDR-M200

New DRM solutions from Frontier Silicon

DRM30/DRM+ module

Demonstrator Receiver

New DRM car receiver

Prototype of DRM car receiver based on NXP Semiconductors chipset

CRD2010

DRM Transmitter

Chipset developments

More and more chipsets for digital radio are being developed and more functionality is being integrated in the chipsets

At this moment, most solutions offer a separate RF front end and baseband IC, but the tendency is to integrate these 2 into a single-chip solution integrating other components as well

This results in smaller solutions for DRM receivers and also in an important price reduction for DRM receivers

Thanks !
